Streamlining Government Support for Small Businesses

Are you confused by the plethora of schemes available to help small businesses? Do you always know where to go for the help you need? DTI's Small Business Service is leading a cross-government 'Business Support Simplification Programme' to make it easier for businesses to access support. The aim of the programme is to increase the ease of use, effectiveness and efficiency of government support to businesses; it is not about cutting the amount of money going to them.

Should the solution be locally based like the Wealden Business Help site and our Regulation Adviser service, or would you prefer a 'one size fits all' national scheme?

If you would like to have your say then follow this link
